Summary

My main research interest is in philosophy of mind and psychology and its intersection with ethics, epistemology and political philosophy. My research engages central philosophical topics while always involving close dialogue with empirical and formal research, from the biosciences and psychology, to economics, computer science, and linguistics. My research focuses on attention, theory of action and consciousness, the relationship between normative and descriptive theories of the mind, and connection between social, technological and psychological structures. After an MA in computational neuroscience, and an MA and PhD in philosophy, I have worked in interdisciplinary environments between philosophy, cognitive science, and other relevant disciplines. I am the author of 31 academic publications, including one single-author monograph, 16 articles or book chapters (13 as single author) in high-ranked journals and book series, and one co-written and edited textbook. My work has been cited 866 times (h-index 10). I regularly give international talks and receive invitations to conferences and workshops (more than 50 international talks to date including two keynotes, book symposia, and two workshops on my work). I am currently leader of an interdisciplinary Centre for Philosophy and the Science (that involves research and teaching components). I am the winner of an ERC Consolidator Grant, I have been principle investigator in a Norwegian Research Council funded project, and core-group member of a Norwegian Centre of Excellence. In the last 10 years, I have acquired more than 3.7 Mill EUR in external funding. I am the winner of a prestigious interdisciplinary Norwegian Research Prize. Experienced supervisor at the level of Research Fellow/Postdoc (2), PhD (4), and MA (10). Widely used as a reviewer in high-ranking journals in my field.

Collaborator

- "Warring with Machines: Military Applications of Artificial Intelligence and the Relevance of Virtue Ethics", Norwegian Research council, from 2020, PI: Greg Reichberg, phil)
- "Aesthetics and Ethics of Attention", from 2020 PI: Susanna Schmetkamp (University of Fribourg)
- "The Subject of Experiences", from 2020 PI: Martine Nida-Rümelin (University of Fribourg)
- "Inequalities of attention economy. Philosophical perspectives to attention and agency in a digital society", from 2020, PI: Kaisa Kärki (postdoc at Kone Foundation")
- "Vision shapes language", Norwegian Research Council 275505, PI: Paula Rubio-Fernandez (psy)
 - This project investigates the contribution of visual processes to verbal communication. My collaboration pertains to the investigation of the role of visual and non-visual forms of joint attention in the acquisition of referential capacities, and in connecting the empirical investigations in this project to important discussions in philosophy, such as the sensory contributions to concept possession or Molineux's problem. We are currently planning one jointly written article. Other collaborating Institutions: Massachusetts Institute of Technology, Yale University, Indian Institute of Technology (Delhi)
- "Perceiving Representations", Norwegian Research Council, 275465, PI: Solveig Aasen (phil)
 - This project investigates the perception of three forms of representation, language, music, and pictures. My collaboration pertains to connections regarding the perception/cognition distinction.
- "Two Thousand Years of Mind-wandering", PI: Halvor Eifring (East Asian Studies)
 - This project studies the history, neuroscience and psychology, and philosophy of mind-wandering and spontaneous thought from a cross-cultural perspective. I cover the "Philosophy" part of the project. Other collaborators: Jessica Andrews-Hanna (University of Arizona, neuroscience), Augustine Casiday (Cardiff, history of Christian monasticism), Jonardon Ganeri (New York University, Buddhist philosophy), Erica Brindley (Pennsylvania State University, Chinese History), Jennifer Eichman (University of London, Chinese History, History of Religion)

Other past and present collaborations include:

- Susanna Siegel (Harvard University)
- Susanna Schellenberg (Rutgers University)
- Wayne Wu (Carnegie Mellon)
- Christopher Mole (University of British Columbia)
- Carolyn Dicey Jennings (UC Merced)
- Adrienne Prettyman (Bryn Mawr College)
