

**Kristine Eide and Kristin Bech**

**ISWOC project**

**University of Oslo**

ISWOC stands for 'Information Structure and Word Order Change in Germanic and Romance languages', and the aim of this project is to study the relation between information structure and word order change in old Germanic (English, Norse/Norwegian and German) and Romance (Portuguese, French and Spanish) languages, with reference to the modern languages. An important part of the project is to create a corpus of text tagged for morphology, syntax and information structure, and we use the application and methods developed by the PROIEL project, with some language-specific adaptations.
