

Figures and references in L^AT_EX: detailed exercises

Diana Santos

10 February 2020

Time was definitely too short to allow for the audience to get familiar with figures and references in a hands-on way. Therefore I wrote here what one could do in two hours with the materials I provided you, and which I briefly introduce here.

Test3 The `.tex` file was supposed to be a testbed for changing the date, the modules, the columns, and to try out to include some pictures. It was also possible to try one figure with two pictures, and a picture wrapping the text (the advanced figure options mentioned in the slides).

expLing This was a full paper (submitted) where I would like you try to change the position of the figures (in the file, and/or with the `[hptb]` option), the captions, the `figure` to `figure*` and see how L^AT_EX would react. You could also try to remove the style of the *Linguamática* journal (and the two-column option) and appreciate the result.

expKK This was another full paper (already published in OSLa) where in addition to the bib file and the figures you had three different `.bst` files (bibliography style files). The idea was to try out the four different bibliography styles, by uncommenting in turn each of the following:

```
\bibliographystyle{sbc}  
%\bibliographystyle{splnCS}  
%\bibliographystyle{plain}  
%\bibliographystyle{SegundoHAREM_iso}
```

The four cases can be seen in folk.uio.no/dssantos/cursloLaTeX/, called `KKwithHAREM.pdf`, `KKwithPlain.pdf`, `KKwithSPLNCS.pdf` and `KKwithSBC.pdf`.

Instructions for L^AT_EX figures and references

Also, you would be welcome to add references to the `.bib` file, and try to refer them in the text, using `\pcite`, `\tcite`, etc.

For those wishing some more guidance or information about references, see

- On Bibtex format and natbib: <https://www.economics.utoronto.ca/osborne/latex/BIBTEX.HTM>
- On biblatex, a newer system for managing references: <http://dag.atifi.uio.no/public/doc/biblatex-guide.pdf>

You are most welcome to ask me further questions on these matters, or clarification about the exercises.
